/ 2021-2022 Cuestionario 01. Basic JavaScript. Operands, Operators and Data types

Comenzado el	miércoles, 23 de febrero de 2022, 12:00		
	Finalizado		
	miércoles, 23 de febrero de 2022, 12:07		
	7 minutos 13 segundos		
empleado			
Calificación	4,05 de 10,00 (41 %)		
Pregunta 1			
Incorrecta			
Se puntúa 0,00 sobre 1	,00		
What's the value	of the expression:		
(10 & 11)			
Caladai			
Seleccione una o			
☐ It produces a	run-time error		
□ 10			
☑ 0	×		
□ 21			
□ 11			
□ null			
□ NaN			
□ IVaIV			
Respuesta incorre	ecta.		
La respuesta corr			

Pregunta 2	
Incorrecta	
Se puntúa 0,00 sobre 1,00	
What's the value of the expression:	
(1024 >>> 1)	
Seleccione una o más de una:	
☑ 1025	×
□ undefined	
□ null	
□ NaN	
□ 2048	
□ 512	
☐ It produces a run-time error	
Respuesta incorrecta.	
La respuesta correcta es: 512	
Pregunta 3	
Correcta	
Se puntúa 1,00 sobre 1,00	
Indicate those which are data types in Javascript	
Seleccione una o más de una:	
☐ float	
✓ number	✓
□ char	
✓ undefined	✓
□ integer	
✓ object	✓
Respuesta correcta	
Las respuestas correctas son: number, undefined, object	

```
Pregunta 4
Incorrecta
Se puntúa 0,00 sobre 1,00
 write the output that this program prints to the screen
    let computerScientist = 'Alan Turing';
    let scientist = 'Albert Einstein';
    console.log(computerScientist ?? scientist);
 Respuesta: Alan Turing Albert Einstein
 La respuesta correcta es: Alan Turing
Pregunta 5
Correcta
Se puntúa 1,00 sobre 1,00
 Considering that the largest integer that can be represented in JavaScript is 2^53=9007199254740992,
 please indicate the value of the following expressions:
 Math.pow(2, 53) - 1
                      9007199254740991
 Math.pow(2, 53) + 2
                      9007199254740992
 Math.pow(2, 53) + 1 | 9007199254740992
 Math.pow(2, 53) - 2
                      9007199254740990
 Respuesta correcta
 La respuesta correcta es: Math.pow(2, 53) - 1 \rightarrow 9007199254740991, Math.pow(2, 53) + 2 \rightarrow
 9007199254740992, Math.pow(2, 53) + 1 \rightarrow 9007199254740992, Math.pow(2, 53) - 2 \rightarrow 9007199254740990
```

Parcialmente correcta			
Se puntúa 0,80 sobre 1,00)		
For each case, indic	ate the value r	eturned by typeof	
typeof 'foo'	المام أمام ال		
	"object"	×	
typeof undefined	"undefined"	~	
typeof console.log	"function"	~	
typeof 3.1416	"number"	~	
typeof null	"object"	~	
Respuesta parcialm	ente correcta.

Parcialmente correcta)		
Parcialmente correcta		rue:	
Parcialmente correcta Se puntúa 0,25 sobre 1,00	ents that are tr		×
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression	ents that are tr : (false > true)		×
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression	ents that are tr : (false > true) ues, true becor	is true mes 1 and false becomes 0	×
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression For boolean val	ents that are tr : (false > true) ues, true becor npare values of	is true mes 1 and false becomes 0	× •
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression For boolean val You can not cor	ents that are tr : (false > true) ues, true becor mpare values of ng values of diff	is true mes 1 and false becomes 0 f different types ferent types, JavaScript converts the values to numbers	* *
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression For boolean val You can not cor When comparir The expression	ents that are tr : (false > true) ues, true becor mpare values of ng values of diff : (0 == false) is	is true mes 1 and false becomes 0 f different types ferent types, JavaScript converts the values to numbers	* *
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression For boolean val You can not cor When comparir The expression A regular equal	ents that are tr : (false > true) ues, true becor mpare values of ing values of diff : (0 == false) is ity check == h	is true mes 1 and false becomes 0 f different types ferent types, JavaScript converts the values to numbers s true	×
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression For boolean val You can not cor When comparir The expression A regular equal	ents that are tr : (false > true) ues, true becor mpare values of ng values of diff : (0 == false) is ity check == h	is true mes 1 and false becomes 0 f different types ferent types, JavaScript converts the values to numbers s true	×
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression For boolean val You can not cor When comparir The expression A regular equal	ents that are tr : (false > true) ues, true becor mpare values of ng values of diff : (0 == false) is ity check == h ente correcta. rrectamente 3.	is true mes 1 and false becomes 0 f different types ferent types, JavaScript converts the values to numbers s true	* * *
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression For boolean val You can not cor When comparir The expression A regular equal Respuesta parcialm Ha seleccionado cor Las respuestas corre	ents that are tr : (false > true) ues, true becor mpare values of ng values of diff : (0 == false) is ity check == h ente correcta. rrectamente 3. ectas son:	is true mes 1 and false becomes 0 f different types ferent types, JavaScript converts the values to numbers s true	* *
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression For boolean val You can not cor When comparir The expression A regular equal Respuesta parcialm Ha seleccionado cor Las respuestas corr When comparing va	ents that are tr : (false > true) ues, true becor mpare values of ing values of diff : (0 == false) is ity check == h ente correcta. rrectamente 3. ectas son: alues of differer	is true mes 1 and false becomes 0 f different types ferent types, JavaScript converts the values to numbers s true as a problem. It cannot differentiate 0 from false	* *
Parcialmente correcta Se puntúa 0,25 sobre 1,00 Indicate the statem The expression For boolean val You can not cor When comparir The expression A regular equal Respuesta parcialm Ha seleccionado cor Las respuestas corr When comparing va	ents that are tr : (false > true) ues, true becor mpare values of ng values of diff : (0 == false) is ity check == h ente correcta. rrectamente 3. ectas son: alues of differer true becomes	is true mes 1 and false becomes 0 f different types ferent types, JavaScript converts the values to numbers s true as a problem. It cannot differentiate 0 from false of types, JavaScript converts the values to numbers, 1 and false becomes 0,	×

Pregunta 10	
ncorrecta	
Se puntúa 0,00 sobre 1,00	
What's the value of the expression:	
(1024 / 0)	
Seleccione una o más de una:	
□ NaN	
☐ Infinity	
□ 1024	
undefined	
□ 0	
It produces a run-time error	×
□ null	
Respuesta incorrecta.	
La respuesta correcta es: Infinity
